

# REALISTIC STAGE CIGARETTE PROP

For Theatre, Film & Live Performance

Create authentic smoking scenes without ash, smoke smell or restrictions

## PROBLEM & SOLUTION

Most theatres, film productions, operas and live venues do not allow real cigarette smoking. However, many productions still require realistic smoking scenes as part of a performance.

The Stage Props cigarette system provides a simple and professional solution, creating a realistic smoking effect without ash, smoke smell, open flame or the restrictions associated with real cigarettes.

## HOW IT WORKS

- Looks like a real cigarette
- Realistic filter appearance
- Tip glows when inhaled
- Produces a visible vapour effect
- No combustion, no ash, no open flame
- Minimal scent
- Designed specifically for stage and production environments

## TRUSTED BY PROFESSIONAL PRODUCTIONS

Used by actors, theatres, film productions, operas and professional acting schools across Europe, North America and Australia.

## PRODUCT OVERVIEW

System includes:

- Rechargeable battery
- Replaceable cartridges
- USB charging equipment

Key features:

- Approx. 300 uses per cartridge
- Easy operation (no buttons)
- Consistent and reliable effect
- Suitable for rehearsals and performances
- Professional stage-use design

## MATERIALS & FORMULATION

Cartridges contain a PG/VG-based formulation (propylene glycol and vegetable glycerine), with no additional ingredients. These substances are widely used in theatrical smoke machines and stage effects. Contains no nicotine.
